

Manual on Subsurface Investigations

National Highway Institute
Publication No. FHWA NHI-01-031
Federal Highway Administration
Washington, DC

Geotechnical Site Characterization

July 2001

by Paul W. Mayne, Barry R. Christopher, and Jason DeJong

SUBSURFACE INVESTIGATIONS

TABLE OF CONTENTS

	Page
Preface	ii
Units Conversions	ii
Table of Contents	iii
LIST OF NOTATIONS	x
1.0 Introduction	1-1
1.1 Scope of this Manual	1-1
1.2 Geotechnical Engineer's Role in Subsurface Exploration	1-2
2.0 Project Initiation	2-1
2.1 Project Type	2-1
2.1.1 New Construction	2-1
2.1.2 Rehabilitation Projects	2-2
2.1.3 Contaminated Sites	2-3
2.2 Existing Data Sources	2-4
2.3 Site Visit/plan-in-hand	2-6
2.4 Communication with Designers/Project Managers	2-6
2.5 Subsurface Exploration Planning	2-8
2.5.1 Types of Investigation	2-8
• Remote Sensing	2-8
• Geophysical Investigations	2-10
• Disturbed Sampling	2-10
• In-Situ Investigation	2-10
• Undisturbed Sampling	2-10
2.5.2 Frequency and Depth of Borings	2-10
2.5.3 Boring Locations and Elevations	2-12
2.5.4 Equipment	2-12
2.5.5 Personnel and Personal Behavior	2-15
2.5.6 Plans and Specifications	2-15
2.6 Standards and Guidelines	2-15
3.0 Drilling and Sampling of Soil and Rock	3-1
3.1 Soil Exploration	3-1
3.1.1 Soil Drilling	3-1
• Continuous Flight Augers	3-1
• Hollow-Stem Augers	3-2
• Rotary Wash Borings	3-5
• Bucket Auger Borings	3-8
• Area Specific Methods	3-9

	• Hand Auger Borings	3-9
	• Exploration Pit Excavation	3-9
	• Logging Procedures	3-10
	• Photography	3-10
3.1.2	Soil Samples	3-10
	• Disturbed Samples	3-10
	• Undisturbed Samples	3-10
3.1.3	Soil Samplers	3-11
	• Split Barrel Sampler	3-11
	• Thin Wall Sampler	3-14
	• Piston Sampler	3-15
	• Pitcher Tube Sampler	3-16
	• Denison Sampler	3-18
	• Modified California Sampler	3-18
	• Continuous Soil Sampler	3-18
	• Other Soil Samplers	3-19
	• Bulk Samples	3-19
	• Block Samples	3-19
3.1.4	Sampling Interval and Appropriate Type of Sampler	3-20
3.1.5	Sample Recovery	3-20
3.1.6	Sample Identification	3-20
3.1.7	Relative Strength Tests	3-21
3.1.8	Care and Preservation of Undisturbed Soil Samples	3-21
3.2	Exploration of Rock	3-22
3.2.1	Rock Drilling and Sampling	3-22
3.2.2	Non-Core (Destructive) Drilling	3-23
3.2.3	Types of Core Drilling	3-23
	• Coring Bits	3-25
	• Drilling Fluid	3-26
3.2.4	Observation During Core Drilling	3-26
	• Drilling Rate/Time	3-26
	• Core Photographs	3-26
	• Rock Classification	3-27
	• Recovery	3-27
	• Rock Quality Designation (RQD)	3-27
	• Length Measurements of Core Pieces	3-27
	• Assessment of Soundness	3-28
	• Drilling Fluid Recovery	3-28
	• Core Handling and Labeling	3-29
	• Care and Preservation of Rock Samples	3-31
3.2.5	Geologic Mapping	3-31
3.3	Boring Closure	3-32
3.4	Safety Guidelines for Geotechnical Borings	3-32
3.5	Common Drilling Errors	3-35
4.0	Boring Log Preparation	4-1
4.1	General	4-1
4.2	Project Information	4-9
4.3	Boring Locations and Elevations	4-9
4.4	Stratigraphy Identification	4-9

4.5	Sample Information	4-10
4.6	Soil Description/Soil Classification	4-10
4.6.1	Consistency and Apparent Density	4-11
4.6.2	Water Content (Moisture)	4-11
4.6.3	Color	4-11
4.6.4	Type of Soil	4-13
	• Coarse-Grained Soils (Gravel and Sand)	4-13
	• Feel and Smear Test	4-13
	• Sedimentation Test	4-15
	• Visual Characteristics	4-15
	• Fine-Grained Soils	4-15
	• Shaking (Dilatancy) Test	4-16
	• Dry Strength Test	4-22
	• Thread Test	4-22
	• Smear Test	4-22
	• Highly Organic Soils	4-23
	• Minor Soil Type(s)	4-23
	• Inclusions	4-24
	• Geological Name	4-24
4.6.5	AASHTO Soil Classification System	4-25
4.7	Logging Procedures for Core Drilling	4-28
4.7.1	Description of Rock	4-28
4.7.2	Rock Type	4-28
4.7.3	Color	4-30
4.7.4	Grain Size and Shape	4-30
4.7.5	Stratification/Foliation	4-30
4.7.6	Mineral Composition	4-30
4.7.7	Weathering and Alteration	4-30
4.7.8	Strength	4-30
4.7.9	Hardness	4-30
4.7.10	Rock Discontinuity	4-32
4.7.11	Fracture Description	4-33
5.0	In-Situ Testing	5-1
5.1	Standard Penetration Test (SPT)	5-2
5.2	Cone Penetration Testing (CPT)	5-5
	• Piezocone Penetration Testing (CPTu)	5-6
	• Baseline Readings	5-8
	• Routine CPTu Operations	5-8
	• CPT Profiles	5-9
5.3	Vane Shear Test (VST)	5-10
	• Undrained Strength and Sensitivity	5-11
	• Field Vane Results	5-13
	• Vane Correction Factor	5-14
5.4	Flat Plate Dilatometer Testing (DMT)	5-16
5.5	Pressuremeter Testing (PMT)	5-19
5.6	Special Probes and In-Situ Tests	5-22
5.7	Geophysical Methods	5-23

5.7.1	Mechanical Waves	5-23
5.7.2	Seismic Refraction (SR)	5-25
5.7.3	Crosshole Tests (CHT)	5-26
5.7.4	Downhole Tests (DHT)	5-27
5.7.5	Surface Waves (SASW)	5-30
5.7.6	Electromagnetic Waves	5-32
	• Ground Penetrating Radar	5-32
	• Electrical Resistivity (ER) Survey	5-34
	• Electromagnetic (EM) Techniques	5-35
	• Magnetic Surveys	5-36
5.8.	Summary on In-Situ and Geophysical Methods	5-36
6.0	Groundwater Investigations	6-1
6.1	General	6-1
6.2	Determination of Groundwater Levels and Pressures	6-1
6.2.1	Information on Existing Wells	6-1
6.2.2	Open Borings	6-2
6.2.3	Observation Wells	6-2
6.2.4	Water Level Measurements	6-3
	• Chalked Tape	6-4
	• Tape with a Float	6-4
	• Electric Water-Level Indicator	6-4
	• Data Loggers	6-4
6.3	Field Measurement of Permeability	6-5
6.3.1	Seepage Tests	6-6
	• Falling Water Level Method	6-7
	• Rising Water Level Method	6-7
	• Constant Water Level Method	6-7
6.3.2	Pressure (“Packer”) Test	6-8
6.3.3	Pumping Tests	6-10
6.3.4	Slug Tests	6-15
6.3.4	Piezocone Dissipation Tests	6-16
7.0	Laboratory Testing for Soils	7-1
7.1	General	7-1
7.1.1	Weight-Volume Concepts	7-1
7.1.2	Load-Deformation Process in Soils	7-2
7.1.3	Principle of Effective Stress	7-3
7.1.4	Overburden Stress	7-3
7.1.5	Selection and Assignment of Tests	7-4
7.1.6	Visual Identification of Soils	7-7
7.1.7	Index Properties	7-8
	• Moisture Content	7-8
	• Specific Gravity	7-8
	• Unit Weight	7-9
	• Sieve Analysis	7-10
	• Hydrometer Analysis	7-11
	• Atterberg Limits	7-11
	• Moisture-Density (Compaction) Relationship	7-12

	• Classification of Soils	7-14
	• Corrosivity of Soils	7-14
	• Resistivity	7-15
	• Organic Content of Soils	7-15
7.1.8	Strength Tests	7-16
	Total or Effective Stress Analysis	7-16
	• Unconfined Compressive Strength of Soils	7-18
	• Triaxial Strength (TX)	7-19
	• Direct Shear (DS)	7-22
	• Direct Simple Shear (DSS) Test	7-22
	• Resonant Column	7-24
	• Miniature Vane	7-26
	• California Bearing Ratio (CBR)	7-26
	• R-Value Test	7-27
	• Resilient Modulus	7-27
7.1.9	Permeability	7-28
7.1.10	Consolidation	7-30
	• One-Dimensional Compression (Consolidation)	7-33
	• Swell Potential of Clays	7-33
	• Collapse Potential of Soils	7-33
7.2	Quality Assurance for Laboratory Testing	7-34
7.2.1	Storage	7-34
7.2.2	Sample Handling	7-34
7.2.3	Specimen Selection	7-34
7.2.4	Equipment Calibration	7-35
7.2.5	Pitfalls	7-35
8.0	Laboratory Testing for Rocks	8-1
8.1	Introduction	8-1
8.2	Laboratory Tests	8-1
8.2.1	Strength Tests	8-1
	• Point-Load Strength Test	8-3
	• Uniaxial Compression Test	8-4
	• Split Tension (Brazilian) Test	8-5
	• Direct Shear Strength of Rock	8-6
8.2.2	Durability	8-7
	• Slake Durability	8-8
	• Soundness of Riprap	8-9
	• Durability Under Freezing and Thawing	8-9
8.2.3	Strength-Deformation Characteristics	8-10
	• Elastic Moduli	8-10
	• Ultrasonic Testing	8-11
8.3	Quality Assurance for Laboratory Testing	8-12
8.3.1	Cautions	8-12
9.0	Interpretation of Soil Properties	9-1
9.1	Introduction	9-1

9.2	Compositional and Classification	9-2
9.2.1	Soil Classification and Geostratigraphy	9-2
9.2.2	Soil Classification by Soil Sampling & Drilling	9-2
9.2.3	Soil Classification by Cone Penetration Testing	9-4
9.2.4	Soil Classification by Flat Dilatometer	9-6
9.3	Density	9-6
9.3.1	Unit Weight	9-6
9.3.2	Relative Density Correlations for Sands	9-8
9.4	Strength and Stress History	9-13
9.4.1	Drained Friction Angles of Sands	9-13
9.4.2	Preconsolidation Stress of Clays	9-17
9.4.3	Undrained Strength of Clays and Silts	9-22
9.4.4	Lateral Stress State	9-25
9.5	Stiffness and Deformation Parameters	9-27
9.5.1	Small-Strain Shear Modulus	9-29
9.5.2	Modulus Reduction	9-30
9.5.3	Direct and Indirect Assessments of G_0	9-32
9.6	Flow Properties	9-36
9.6.1	Monotonic Dissipations	9-36
9.6.2	Dilatatory Dissipations	9-36
9.7	Nontextbook Materials	9-42
10.0	Interpretation of Rock Properties	10-1
10.1	Introduction	10-1
10.2	Intact Rock Properties	10-5
10.2.1	Specific Gravity	10-5
10.2.2.1	Unit Weight	10-5
10.2.3	Ultrasonic Velocities	10-6
10.2.4	Compressive Strength	10-8
10.2.5	Direct and Indirect Tensile Strength	10-9
10.2.6	Elastic Modulus of Intact Rock	10-11
10.3	Operational Shear Strength	10-15
10.4	Rock Mass Classifications	10-18
10.4.1	Rock Mass Rating System (RMR)	10-20
10.4.2	NGI Q-Rating	10-20
10.4.3	Geological Strength Index (GSI) System	10-21
10.5	Rock Mass Strength	10-24
10.6	Rock Mass Modulus	10-26
10.7	Foundation Resistances	10-27
10.7.1	Allowable Bearing Stress for Foundations	10-27
10.7.2	Side Resistances for Drilled Shafts	10-29
10.8	Additional Rock Mass Parameters	10-30
11.0	Geotechnical Reports	11-1
11.1	Types of Reports	11-1
11.1.1	Geotechnical Investigation Reports	11-1
11.1.2	Geotechnical Design Reports	11-2
11.1.3	GeoEnvironmental Reports	11-5

11.2	Data Presentation	11-5
11.2.1	Borings Logs	11-5
11.2.2	Test Location Plans	11-6
11.2.3	Subsurface Profiles	11-8
11.3	Limitations	11-9
12.0	Contracting of Geotechnical Subsurface Exploration	12-1
12.1	Drilling and Testing Specifications	12-1
13.0	References	13-1
Appendix A	Safety Guidelines for Drilling into Soil and Rock and Health and Safety Procedures for Entry into Borings	A-1
Appendix B	Websites: Geotechnical Equipment Suppliers and Service Testing Companies	B-1
